Re: Ex Parte Report, CC Docket No. 90-314, ET Docket No. 92-100

Dear Ms. Searcy:

This will notify the Commission of an ex parte presentation today by PCN America, Inc. in the above referenced proceeding. Messrs Gary Jones and Dick Edge discussed the attached material with Mr. Brian Fontes and Ms. Lauren Belvin of the Commission staff.

Sincerely,

Joe D. Edge

Federal Communications Commission
Office of the Secretary

WILLICOM INC.

PCN AMERICA, INC.

NPRM 90-314 92-100

- **Focus on moving microwave users**
 - **emphasis on negotiations**
 - **high power levels allowed**
 - **interference criteria: TSB10-E**
- **Sharing is not considered - Why not?**

**Personal
Communications**

MILLICOM INC.

PCN AMERICA, INC.

Sharing with Microwave Still the "Best Idea"

- **Immediate PCS deployment**
- **Public Safety grandfathered**
- **Avoids long litigation**
- **Fully utilizes frequencies**
- **Applicable in MOST cases**

**Personal
Communications**

WILLCOM INC.

PCN AMERICA, INC.

Sharing with Microwave A Millicom Concept in 1989

- **Interference Management**
 - **Overlay using spread spectrum**
 - **Avoidance with patterned antennas**
- **Signal Cancellation**
 - **Combat interference at microwave**

**Personal
Communications**

MILlicom INC.

Interference Management

- Spread spectrum and CDMA
- Computer modeling of interference - Comsearch
- Cell placement and splitting
- Patterned antennas
- *Notch filters are not applicable with the block allocations and power levels proposed in the NPRM*

PCN AMERICA, INC.

Signal Cancelling Technology

- **Located on Microwave front end**
- **Detects "foreign" signals**
- **Cancels "foreign" signals before receiver**
- **Source - US electronic warfare**

**Personal
Communications**

MILLICOM INC.

PCN AMERICA, INC.

New Technology - Why Now?

- **High speed Digital Signal Processing (DSP) chips**
- **High speed computers**
- **Powerful computer software**
- **Ability to "footprint" signals**
 - **Applicable for CDMA and TDMA**
 - **both technologies are being explored**

**Personal
Communications**

MILLCOM INC.

PCN AMERICA, INC.

Challenges

- **Economics**
 - **Can equipment be built cost effectively?**
- **Politics**
 - **Does the Congress and the FCC want sharing with microwave?**

**Personal
Communications**

MILlicom INC.

PCN AMERICA, INC.

Next Steps

- **Involve major equipment manufacturers**
 - **Rockwell International**
 - **TeleSciences**
- **Prepare live demonstration**
 - **September**
- **Ask the FCC about sharing**

**Personal
Communications**

MILLICOM INC.

PCN AMERICA, INC.

Millicom U.K. Network and Local Loop Competition

- **License Application: December 1991**
- **License Awarded: August 11, 1992**

**Personal
Communications**

MILlicom INC.

PCN AMERICA, INC.

Millicom U.K. Spectrum Sharing

- **Technology**
 - **Broadband Direct Sequence MDMA**
 - **combination of CDMA/TDMA**
- **Existing Spectrum Users**
 - **licensed fixed microwave**
 - **licensed satellite downlink**

**Personal
Communications**

MILlicom INC.

PCN AMERICA, INC.

U.K. Telecom Policy Objectives

- **Promote Competition to British Telecom**
- **Dramatic improvement in price/performance characteristics**
 - lower build costs
 - computing versus telecommunications
- **Share Spectrum**
 - rapidly introduce new technology
 - efficiently utilize spectrum

**Personal
Communications**

VILLICOM INC.

PCN AMERICA, INC.

U.K. Bandwidth Allocation

- **Two 84 MHz bands**
- **Carrier frequencies adjustable over 500 MHz**
- **Spectral range 3.7 - 4.2 GHz**
- **Adequate spectrum to offer:**
 - **Voice, data and video services at speeds approaching coaxial cable**

**Personal
Communications**

MILLICOM INC.

Service Mix Available on Different Transmission Media

Service Complexity

Service Mix

Wireless Service Offerings

PCN AMERICA, INC.

Millicom U.K. U.S. Policy Implications

- U.S. PCS docket is already 3 to 5 years behind the U.K.
- U.K. Broadband license award and U.S. PCS frequency limitation threaten to increase the U.K. technology lead
 - Will U.S. manufacturers participate in leading technology development?
 - Will U.S. consumers benefit from dramatic improvements available with existing technology in price/performance characteristics of telecommunications?
- When will U.S. consumers see large scale network and local loop competition?

**Personal
Communications**

MILlicom INC.

PCN AMERICA, INC.

NPRM Proposes to Eliminate Wideband (40 MHz) CDMA

- **Frequency division for licensed PCS
(15 MHz in each direction)**
 - compatible with microwave channelization
 - comparable to cellular
 - designed to aid microwave relocation
- **Channelization for non-licensed PCS**
- **Implication - network and local loop
competition delayed**

**Personal
Communications**

VILICOM INC.

PCN AMERICA, INC.

Limiting Bandwidth Also Limits the "Best Options" of CDMA

- **Easy technology for "Signal Cancelling"**
- **Less microwave relocation needed**
- **Higher capacities than other technologies**
- **Higher data rates than other technologies**
 - **Wideband CDMA has shown to be the only technology to have throughput data rates comparable to Landline**

**Personal
Communications**

MILLICOM INC.

PCN AMERICA, INC.

Wideband CDMA Meets Requirements

- **The only technology to:**
 - **deliver PCS services required by industry user consensus**
 - **have voice quality comparable to Landline**
 - **transmit both voice and data without requiring dedicated channels**
 - **easily migrate from large to micro cell implementation**

**Personal
Communications**

MILLCOM INC.

PCN AMERICA, INC.

Frequency Allocation Answer Licensed PCS

- Block A (1850-1870/1930-1950 MHz) allocated
- Block B (1870-1890/1950-1970 MHz) allocated
- Block C (1890-1920/1970-1990 MHz) held in reserve

**Personal
Communications**

MILLCOM INC.

PCN AMERICA, INC.

Benefits of New Allocation

- **Either TDMA and CDMA can be accommodated**
 - **services and capabilities associated with CDMA will not be precluded**
- **CDMA data rates will provide easy telecommuting**
- **An allocation is reserved for expansion or additional licenses (If more than two licenses per market are shown to make economic and competitive sense)**
- **Comparable to UK PCS service offering licensed 3 years ago**
